

PRAVEEN KUMAR D

Software Engineer

praveenkumard.dev@gmail.com | 9741485602 | Bengaluru, India | github.com/Praveen-here | linkedin.com/in/praveensli

SUMMARY

Backend-focused software developer with expertise in RESTful APIs, authentication, session management, and scalable backend systems. Strong foundation in Data Structures and Algorithms, achieving a 1443 LeetCode rating and serving as a HackerRank Campus Ambassador.

EDUCATION

PES University, Master of Computer Applications - 8.25 CGPA

2025 – 2027
Bengaluru, India

SKILLS

Languages – Java, Python, JavaScript

Backend – Node.js, Express, FastAPI, Flask

Frontend – React, Next.js

Databases – MongoDB, PostgreSQL, MySQL, Redis

Cloud – AWS, Docker, Git, Firebase

PROJECTS

PESU Tracker [🔗](#), Academic Analytics Platform

Tech Stack: Next.js, Node.js, Express.js, Redis, PostgreSQL, Vercel, Render, Better Stack

- Engineered a full-stack academic analytics platform using **Next.js** and **Express.js**, delivering attendance analytics, safe bunk prediction, recovery insights, and CGPA tracking for **600+ students** sustaining **30+ daily active** users
- Reverse engineered** authenticated university endpoints by analyzing network traffic, implementing **session-based authentication**, **cookie management**, and **HTML parsing** to retrieve live academic data without official API support.
- Designed scalable **RESTful APIs** with **Redis**-based session storage and a **two-layer backend architecture** to overcome **CORS restrictions**, enabling secure communication between the frontend and university servers.
- Deployed the application on **Vercel** and **Render** with **Better Stack** uptime monitoring, ensuring reliable production availability and automated health checks.

ANONYMOUS SOCIAL PLATFORM [🔗](#)

Tech Stack: JavaScript, HTML, CSS, Node.js, Express.js, MongoDB, SocketIO, Google Perspective API

- Built a full-stack anonymous social platform using **Node.js**, **Express.js**, **MongoDB**, and **JavaScript**, supporting anonymous posting, liking, commenting, and real-time interactions with SocketIO.
- Integrated **Google's Perspective API** for AI-powered abuse detection and automated content moderation, enabling real-time filtering of toxic user-generated content.
- Developed scalable **RESTful APIs** for post management and user interactions, serving **100+ users** and **200+ user-generated posts**.

EXPERIENCE

SOFTWARE ENGINEER - INTERN, [DETERMINANT STUDIOS](#) [🔗](#)

03/2025 – 06/2025
Bengaluru

- Engineered a backend invoice automation system using **Python**, **FastAPI**, and **MongoDB**, leveraging **Generative AI APIs** for intelligent invoice data extraction, reducing manual processing time by **60%**.
- Designed and developed **RESTful APIs** for invoice processing, data validation, and database operations, improving workflow efficiency and backend maintainability.
- Collaborated with the development team to build and integrate backend services, ensuring reliable data processing and seamless API communication.

ACHIEVEMENTS

LEETCODE [🔗](#)

- Solved **340+ Data Structures and Algorithms** problems with a **LeetCode Contest Rating of 1440+**

HACKERRANK CAMPUS AMBASSADOR [🔗](#)

02/2026 – 08/2026
Bengaluru

- Represented **HackerRank** as Campus Ambassador at **PES University**, organizing coding contests, engaging student communities, and promoting competitive programming initiatives.

TECHNICAL EVENT HEAD | INNOVEX 1.0

- Served as **Technical Event Head**, coordinating technical events and competition logistics.
- Designed problem statements for a **12-hour hackathon** involving **40+ participants**.
- Organized and hosted a **competitive programming contest** for **30+ participants**.
